

The Ultimate Shop for Racers

Atomic Pro Centers are our competence centers created exclusively for FIS members and race enthusiasts, from junior racers to World Cup competitors. You'll quickly discover it's not just the gear that makes these places special. Our experienced alpine race technicians will work with you to find the perfect ski set-up. Our main Atomic Pro Center is located at the Atomic global headquarters in Altenmarkt, on the same site as our ski production and R&D facilities. Besides, there is also an Atomic Pro Center at SNO in Oslo and over 30 Atomic Pro Center Partners worldwide.

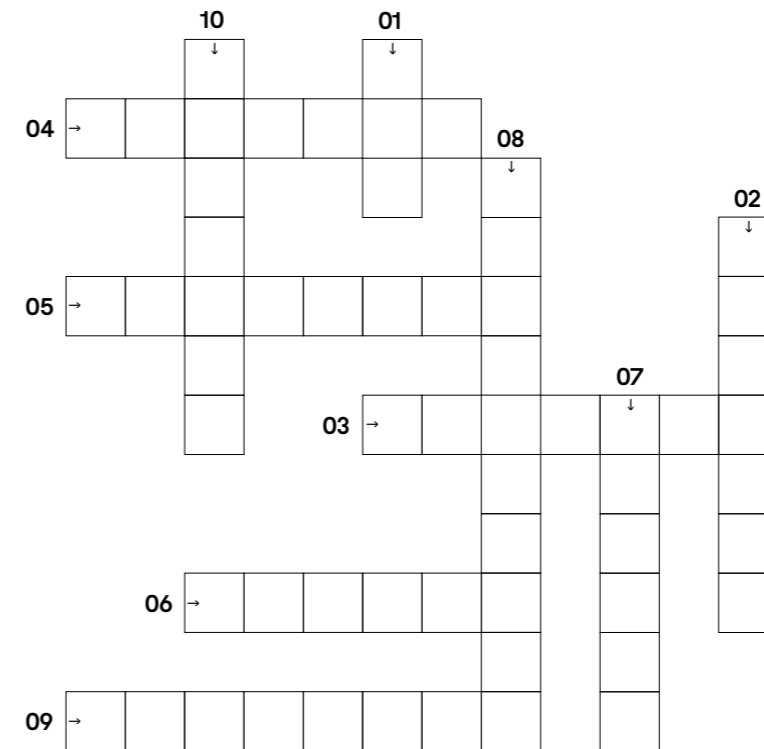

Experts with World Cup experience will share our top-end racing equipment with you and build your own individual set-up. It enables racers on the way up to experience the unique service enjoyed by our top Atomic stars – from having their skis tuned in our Race Department with Wintersteiger equipment to having their boots professional fitted by our Atomic race technicians.

Racing services are available in Altenmarkt and Oslo, and any of our Pro Center partners in your region. To make sure we have enough time for individual service, please book an appointment in advance. Please find our Atomic Pro Center and Pro Center Partners listed on the back page of the catalog.

How Well Do You Know Our Athletes?

Insert their last names into the word puzzle.

- 01 → Has a degree in computer science.
- 02 → Had snowfall during his/her August wedding.
- 03 → Is the first Norwegian skier to wear a Redster helmet and goggles in the World Cup.
- 04 → Crowned Vice World Champion on home ground in 2025.
- 05 → Dances Samba in the finish area of World Cup races.
- 06 → Said, "The only thing I can do is polenta".

- 07 → Is an accomplished player of the cello, drums, and guitar.
- 08 → Started a food blog series with recipes from fellow ski racers.
- 09 → Is part of the ownership group of a women's football team.
- 10 → Has his/her own Redster signature goggle.

Answers:
01 Nel, 02 Gärtner, 03 Moeller, 04 Puchner, 05 Braathen, 06 Goggia, 07 Ljutic, 08 Hintermann, 09 Shiffrin, 10 Schwarz.

▪ Mikaela Shiffrin

▪ Aleksander Aamodt Kilde

▪ Zrinka Ljutic

▪ Lucas Pinheiro Braathen

▪ Sofia Goggia

▪ Marco Schwarz

▪ Joana Hählen

▪ Manuel Feller

▪ Christina Ager

▪ Mirjam Puchner

Once a Junior, Forever a Champion

“When I was 12, and I think Mikaela was 13, they set up rooming lists, and I got roomed with this introverted blonde girl. And we bonded over the fact that we both skied on Atomic. And who would have thought, all these years later, here we would be. Still on Atomic.”

The two girls in this story are none other than Mikaela Shiffrin and Breezy Johnson, who became World Champions in the first-ever Team Combined at the World Championships in Saalbach - a new race format where a Downhill skier and a Slalom skier team up, and their combined times determine the winner. This format highlights skiing’s unique duality: competing individually but training and traveling as a team. Winning the World Championship title provided a chance for reflection.

“I think we connected specifically about feeling like we were a little bit lost in a world where young girls were not really supposed to be as ambitious as we were. And looking forward these many years where we’ve come to and the journeys we’ve both been through has been unbelievable to watch from afar and now to watch up close.”

Mikaela’s career - as we all know - is legendary. Breezy’s path was a fight. After years of injuries and no World Cup victory, she came to Saalbach determined to prove herself - and did. Breezy claimed Downhill gold and teamed up with Mikaela. The rest is history - a story that began in a hotel room in the U.S. and reached its latest chapter in Saalbach. At Atomic, we know that stories like Mikaela’s and Breezy’s don’t just happen by chance. They are built on determination and the courage to dream big. That’s why we invest in nurturing the next generation of ski racers through our Juniors To Champions (JTC) program.

Supporting young, up-and-coming athletes with high-quality equipment, tuning, and boot fitting has always been a top priority for Atomic. With JTC, we take junior development to the next level by combining 70 years of racing expertise with the knowledge of our World Cup athletes. From physical conditioning, mental strength, and regeneration to nutrition and product know-how, we provide young racers with access to our network of experts - preparing them for the rigorous demands of professional sports.

Through online coaching calls, on-snow training sessions, and unique experiences like prototype testing and behind-the-scenes access to World Cup races, JTC creates a true sense of community. It’s not just about getting faster; it’s about building friendships, sharing knowledge, and inspiring each other - just as Mikaela and Breezy did when their journey began. With JTC, we want Atomic to be a name young racers can rely on from their first junior race right up to the World Cup. Because once a junior, forever a champion.

Construction →

Revoshock

When you're skiing at your limit, a smooth and precise ride makes all the difference. That's why we created Revoshock – a built-in suspension system for your skis – to block distracting bumps before they reach your feet. Made using an integrated grid of impact-absorbing stainless steel inserts embedded in an additional soft component, the new generation of Revoshock dampens even the deepest ruts and grooves to cushion up your line.

Carbon Boost

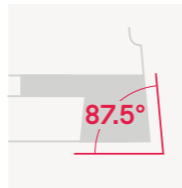

For your fastest days you need additional power, so we developed the Carbon Boost – a carbon insert that sits beneath your heel – to stiffen up your ski exactly where you need it. Providing a rebound of power to enhance your acceleration, Carbon Boost supercharges your turn exit from the gate to the piste.

Edge Angles →

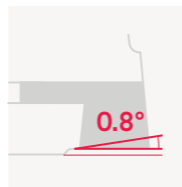

Side Edge Angle

Precisely tuned edges are an important part of ski performance. A dull edge cannot penetrate the snow surface and will skid through a turn. An edge that is too sharp will grab and catch the snow surface creating unstable performance. Our skis are prepared with a side edge angle of 87.0° for more intuitive handling, easier skiing and better grip on hard snow and ice.

Base Edge Angle

All skis from our factory are delivered with steel edges that have been carefully machined with a precise base edge bevel for specific performance characteristics. For our FIS skis we're using base edge angles from 0.5° (SL) to 0.8° (GS and JR) and 1.0° (SG and DH). They lightly lift the ski edges off the snow for easy turning while maintaining excellent edge grip and aggressive tracking throughout the turn.

Sidewalls →

Full Sidewall

Full sidewall runs across the full length of the ski for precise steering.

Dura Cap Sidewall

Sidewall from base to top sheet, for controlled power transmission and great edge grip. The rounded shape of the Dura Cap is a fantastic durability feature as it picks up fewer dents and dings.

Core →

Ultra Power Woodcore

Made from strong ash – for supreme running stability and agility in our racing skis.

Power Woodcore

A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

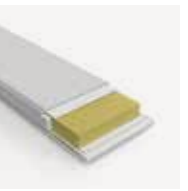

Light Woodcore

Made from Poplar wood, this core optimizes the ski's weight without sacrificing any shock absorption or stability.

Densolite Core

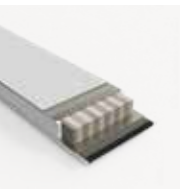

A foam core that's agile and dampens vibrations – for effortless skiing.

Laminate →

Ultra TI Powered

Our World Cup, athlete-proven technology Ultra Titanium Powered with updated double bonding is a Titanal laminate that runs from sidewall to sidewall adding stability, torsional rigidity and edge grip.

TI Powered

A Titanal layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

Icon Family

Icon WC 30/24

The Icon loved and trusted by our World Cup athletes. A podium winner in all disciplines, its centralized power transmission delivers the highest levels of performance, agility and responsiveness.

Icon RS 19/16/12

The Icon for athletes on their way to the World Cup! As well as masters and other strong racers. It has the same centralized power transmission as its big brother – Icon WC – tailor-made for racing through the age groups.

Icon 12/10

The Icon for youngsters starting to get serious! It delivers the perfect weight and performance levels for children and juniors competing mainly in SL & GS – helping them stay in total control of their skis.

Centralized Power Transfer →

A wider base plate and race mounting pattern strategically position the binding screws directly under the boot to centralize and optimize power transmission. Delivering immediate power underfoot while allowing for more reactivity and response throughout the entire length of the ski, Centralized Power Transfer enables the racer to be in better control of the ski throughout the turn – in every discipline and type of course setting.

Metal Race Pedal →

Designed to deliver the best power transfer from boot to binding, Metal Race Pedal allows the boot to sit directly on the AFD for more direct energy transmission.

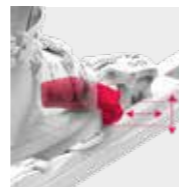

Elevated Brakes →

Our Elevated Brakes get up and out of the way, tucked in closer to the heelpiece of your binding, letting you ski more aggressive edge angles with less risk of catching the snow.

Automatic Toe Adaptation →

The toe adapts automatically to your alpine normed boot height and width and ensures constant release values, even on worn out boots.

 Mounting information on the plate

Redster Family

Redster STR

A high-energy boot in a slim 91 mm last, built for racers with narrow feet and a slighter build.

Redster TR

Exceptional performance and power in a World Cup boot with 93 mm last, designed with top athlete input.

Redster TX

An on-piste, race inspired boot with 96 mm last and a relaxed fit for all-day comfort and adaptability.

Redster TJ

Built with a 98 mm last for junior racers, this boot suits young, performance-oriented athletes.

The Redster Thread

Alpine Race

Consistent liner constructions across all three fits.

Same forward lean and ramp angle across all three fits.

Same stance in all three fits.

Redster WC

Feel Safe as You Race

Race with confidence thanks to Redster's state-of-art AMID 360° impact protection and energy absorption.

An Instant Race Fit

Redster's customizable Live Fit pads deliver a race fit so secure you'll forget you're wearing it.

Trusted by Our Athletes

Worn by our juniors up to our World Cup pros, the Redster helmet was created by racers for racers.

* no tolerance/** - 5 cm tolerance For masters athletes the ski length is a recommendation (except SG)! No restrictions regarding length, width and radius for Women above 55 and Men above 65! The FIS recommendations and rules for ski length, radius and profile width can be found in the current FIS Specifications for Competition Equipment! www.fis-ski.com					

Ski selection of FIS products, both length and model, will be always very individual and a subjective decision. We noticed some common trends and following chart should help you to make the right decisions. The optimal skis FIS model and length is determined by the ability, the weight and also the strength of the user.
